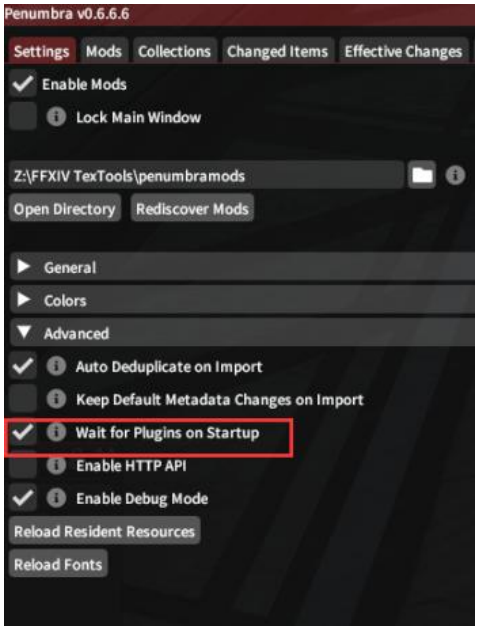
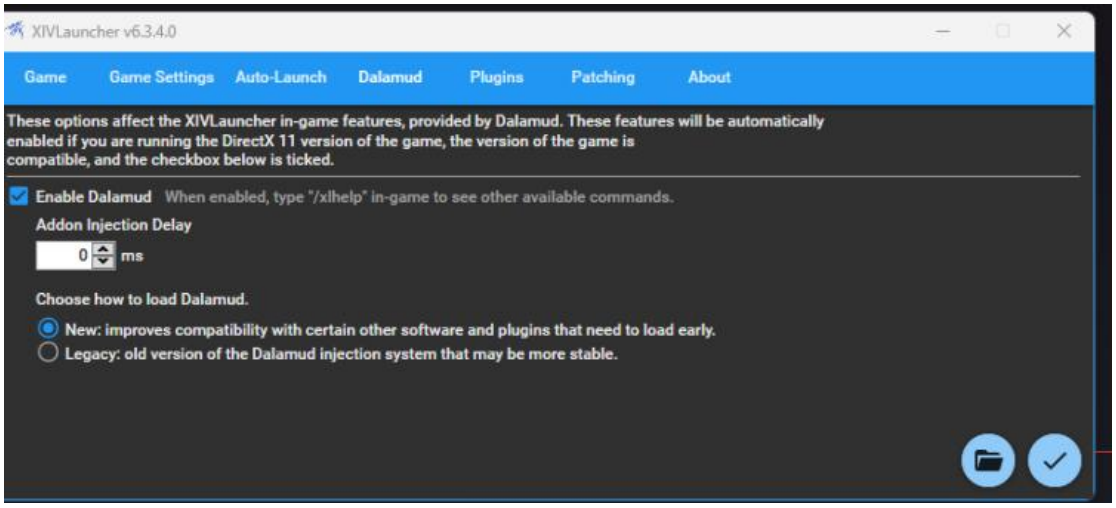
Tips1:

~~If you have issue on draw the weapon,try to enable "wait for plugins on startup" option in penumbra , Iso there is a similar option in dalamud,it's better to enable it,too.~~
~~Make sure you keep enabling the nero mod then restart the game.~~
~~By the way, make sure your xivdalamud setting choose"New"and 0ms delay.~~
~~If it still doesnt work,the last solution is using textools to install fix pack.It will not affect any other things but only fix the issue for draw when using penumbra.~~
~~([Nero]Draw fix patch for textools.ttmp2)~~



Now this issue should be completely fixed!But if you still have some similar issue you also can try these setting.



XIVLauncher v6.3.4.0
Game
Game Settings
Auto-Launch
Dalamud

Patching
About
These options affect the XIVLauncher in-game features, provided by Dalamud. These features will be automatically enabled if you are running the DirectX 11 version of the game, the version of the game is compatible, and the checkbox below is ticked.
Enable Dalamud
When enabled, type "/xlhelp" in-game to see other available commands.
Addon Injection Delay
0
ms
Choose how to load Dalamud.
New: improves compatibility with certain other software and plugins that need to load early.
Legacy: old version of the Dalamud injection system that may be more stable.

Tips2 :

Due to the strong correlation between the actions of the Continuation combo. In daily use, for smoother movements, the following suggestions are recommended for your rotation:
1.After 【Jugular Rip】, try to directly use 【Savage Claw】 as much as possible ,and do not insert other abilities, but you can insert them before it.
2.After 【Abdomen Tear】, try to directly use 【Wicked Talon】 as much as possible, and do not insert other ability skills, but you can insert them before it.

3.The 【Double Down】is recommended to follow the【Bow Show】 which can make actions more coherent.
Of course, in Raid, you can follow your habits.

Recommended rotation cycle:
【No Mercy 】-【Sonic Break】-【Blasting Zone】-【Bow Shock】-【Double Down】-（Rough Divide）-【Gnashing Fang】-【Bloodfest】-【Jugular Rip】-【Savage Claw】-（Rough Divide）-【Abdomen Tear】-【Wicked Talon】-【Eye Gouge】-【Burst Strike】+【Hypervelocity】X3

Tips3:

These following icons of PVP skills also may have possiblity meet some issue when you first install them by penumbra.If it happened,the solution is like **Tips1**

Tips4:

If you ensure that you follow the correct steps to install and use multi hit, but the time of flytext still cannot match the action, please check your network latency. Multihit is recommended for use in low network latency environments.

Tips5:

The equipment to be replaced with mod is:
Crystarium Manatrigger=Red queen
Spriggan series=Nero set(not fit all races)
Deepshadow Pistol=Blue rose
In addition, due to the mechanical arm, some Monk's fists have been requisitioned, so it is recommended not to use:

Ai Apaec	Mythrite Jamadhars	Flame Elite's Jamadhars
Serpent Elite's Claws	Dreadwyrm Claws	Storm Elite's Claws
Giantsgall Claws	Serpent Officer's Claws	Flame Officer's Jamadhars
Storm Officer's Hooks
